B. For the purpose of determining wastewater volume, the user's metered water consumption will be used. An adjustment may be made (at the City's discretion and with the City's approval, on a limited basis only) to deduct water usage for purposes not requiring discharge into the sanitary sewer. For users that obtain water from an unmetered well, a discharge flow meter approved by the City will be installed at a location accessible to the City. If a substantial amount of water is used for purposes that do not require discharge into the sanitary sewer system, the user will be allowed an option of installing, at the user's expense, a recording meter, of a design approved by the City, for determining wastewater volume.

Section 2. Severability.
The invalidity of any provision of this Ordinance will not affect the validity of the remaining provisions.

Section 3. Effective Date.
This Ordinance will take effect on September 1, 2018 upon second reading approval.

PASSED AND APPROVED this 13th day of August 2018.
